

EDITORIAL DESK

A great satisfaction overwhelms my heart as this first issue in the second volume (2018) of free online open access Journal of Computational Mathematica with ISSN 2456 – 8686 is brought forth after hard work adhering to our primary commitment to quality. A variety of articles have been received and original contributions have been given precedence. An enormous amount of work has gone into the development of this journal and I believe that you will see those efforts reflected in this edition and in the impact it will have.

I am extremely proud of our editorial board and we are fortunate to be able to draw upon their individual and collective knowledge, talent, judgment, and disciplinary backgrounds to advanced engagement in Mathematical research worldwide.

All the submitted papers have been peer reviewed, after a similarity check carried out by the Turn-it-in plagiarism software, by the members of the Editorial Board comprising of distinguished professors in Mathematics. Thus the submitted papers are selected on the basis of originality, significance and clarity. We congratulate all the contributors whose papers are published in this issue. Finally, I thank and appreciate the members of the Management and the research director of the Abraham Panampara Research Center of Sacred Heart College for their constant encouragement to bring out this issue.

I extend my invitation to all those engaged in research in Mathematics to contribute their articles for the next issue in December 2018.

Dr. G. Britto Antony Xavier

Editor – in – Chief

JOURNAL OF COMPUTATIONAL MATHEMATICA

Volume 02

Issue 02

2018

TABLE OF CONTENTS

Some Basic Results on the Second Multiplication Atom-Bond Connectivity Index Equations <i>Wei Gao, Li Liang and Jiemei Zhong</i>	2
Stability of Decic Functional Equations in Multi-Banach Spaces <i>R.Murali, and A.Antony Raj</i>	11
